

Paul Sullivan

Fishing Quicker on Less Fuel

Sydney Based commercial fisherman Paul Sullivan purchased a second hand Randall 47' to use in his trap fishing operation knowing that the original engine was past its use by date.

"All the pro fisherman I spoke to kept recommending Yanmar due to the incredible fuel savings, their quiet operation and uncomplicated maintenance requirements.

After doing my research I settled on the Yanmar 6HYM-ETE plus a MASE IS 6.5 gen set to keep the engine room all Yanmar powered.

The original engine in Rachael E used 30 litres per hour at 9 knots. It was thirsty, noisy and leaked oil.

Now, fishing up and down the NSW coast, the Rachael E operates most efficiently at 12 knots with the Yanmar spinning over at 1550 RPM. Fuel consumption at this speed is 25 litres per hour and I'm glad I choose Yanmar."
